The implementation of ICD-10 will mandate hospitals and health providers to track, monitor and manage diseases and procedures in greater detail. The U.S. Department of Health and Human Services (HHS) has mandated the replacement of the ICD-9 code sets used by medical coders and billers to report health care diagnoses and procedures with ICD-10 codes. The change to ICD-10 will allow hospitals and health providers to track, monitor and manage diseases and procedures in greater detail.

HRS108 (Introduction to ICD-10-CM Diagnosis) 3cr
This course will provide a framework on how the ICD-10-CM coding system for diagnosis is used. It will include pathway tracks for physician practices and inpatient coders and for specialty settings such as home health, and long-term care. It can also include a path for other non-coding health care personnel involved in the transition to ICD-10.
Class is held every Monday from 5:00 pm to 8:00 pm starting 08/24/2015 to 12/13/2015.

HRS110 (Introduction to ICD-10-PCS Procedures) 2cr
This course will provide a framework on how the ICD-10-PCS for hospital inpatient coding is used. It will include pathway tracks for inpatient coders working in acute care.
Class is held every Wednesday from 5:30 pm to 8:30 pm starting 08/24/2015 to 10/28/2015.
